

The path to underwriting efficiency starts here

The underwriting headache

Imagine spending 40% of your workday consumed by admin tasks, searching for correct data across multiple systems. This is the reality for underwriters working with outdated processes. Hindered by slow response times, valuable opportunities slip through carriers' fingers.

It's time for change. It's time we helped you move your business into the next generation of underwriting, where every decision is defined by efficiency, data precision, and growth.

Unleash underwriting speed: The time is now!

The underwriting workbench connects tools, data, and insights into one platform to help underwriters focus on what matters most - underwriting. Implementing the underwriting workbench enables you to:

- Accelerate time-to-market while enhancing risk assessment and pricing accuracy.
- Ensure consistency through data-driven underwriting.
- Enhance the broker experience and streamline business operations.
- Achieve growth without increasing headcount.
- Attract underwriting talent as a 'Next Generation' Insurer.

Your trusted guide to underwriting transformation

We understand that building an underwriting workbench can be daunting. You recognise the need, but it is challenging to see how it fits your current roadmap. We believe this vision is achievable with Capgemini as your partner of choice. Our team of digital transformation specialists has successfully implemented underwriting workbenches for numerous carriers, so we understand the challenges and how to extract maximum value from the underwriting workbench.

You've got questions; we have answers

What are the technology choices for an underwriting workbench, 'commercial off the shelf' or 'self-build'?

We support any technology choice and have an extensive partner network. However, the choice of technology is less significant than how you assemble and integrate it. While each underwriting workbench platform is unique, we've built a well-crafted framework that can often be tailored with only 10% additional customisation to fit your needs. Think of it as a springboard, propelling you towards a brighter underwriting future, not a complex project from scratch.

We've attempted something similar, but it ended up being a workflow. How can we change this?

It's important to understand that the underwriter workbench is an ecosystem. We work with you to build the ecosystem needed to unlock the benefits. This ensures that your workbench evolves alongside the demands of underwriters and your business.

Our business is global and complex, with different processes depending upon where we are underwriting. How can you help us?

We understand complexity as a global leader. We work with you to streamline processes and workflows and uncover automation and AI opportunities. We're not just consultants - we're partners in your success.

What about data - will we need to do preparation work?

Our Insights and Data team can evaluate your data maturity, chart a roadmap toward data-powered underwriting, and assist you in reaching your goals.

**Let's turn your underwriting vision into reality.
